WE ENGINEER DIGITAL SOLUTIONS THAT MOVE BUSINESSES FORWARD

Enterprise Software | Cloud & DevOps |
AI Solutions | IT Consulting

Technology. Innovation. Growth.

YOUR TECHNOLOGY PARTNER FROM IDEA TO DELIVERY

Startups:

MVP development, prototypes, and product engineering.

Growing Businesses:

Custom applications, automation, and cloud modernization.

Enterprises:

Enterprise software, SAP, cloud infrastructure, and integration projects.

Digital Agencies:

White-label development, engineering support, and delivery partnerships.

01

DISCOVER:

Understand business objectives and technical requirements.

02

DESIGN:

Plan user experience, architecture, project scope, and technology choices.

03

DEVELOP:

Build, integrate, and test the agreed solution.

04

DEPLOY & SUPPORT:

Release, monitor, maintain, and improve the solution according to the engagement.

HAVE A PROJECT? LET'S BUILD IT TOGETHER.

Request a project discussion, explore outsourcing partnerships, or enquire about dedicated engineering support.

TECHNOLOGY BUILT AROUND YOUR BUSINESS

VN Softverg Technology Pvt. Ltd. partners with startups, businesses, and agencies to build practical, reliable, and scalable technology solutions. From application development and cloud infrastructure to AI integration and managed technology delivery, we help businesses address technical challenges and advance their digital initiatives.

Reliable Engineering

Scalable Technology Solutions

Practical Business Outcomes

Long-Term Technology Partnerships

END-TO-END IT SOLUTIONS

1. Cloud Solutions & DevOps

Cloud migration, cloud infrastructure, serverless architectures, container orchestration, deployment automation, and infrastructure optimization across AWS, Azure, and Google Cloud.

2. Custom Application Development

Custom web applications, enterprise backends, APIs, database solutions, full-stack development, mobile applications, and automated software testing.

3. SAP Enterprise Solutions

SAP ABAP development, SAP S/4HANA migration, enterprise application integration, SAP functional modules, reporting, and database transition support.

4. AI & Generative AI Solutions

Custom AI applications, AI assistants, workflow automation, Python-powered intelligent systems, LLM integrations, and cloud-based AI deployment.

5. IoT & Smart Systems

Embedded firmware development, ESP32 and STM32 integration, MQTT telemetry, connected devices, time-series databases, and monitoring dashboards.

6. IT Staffing Solutions

Technical talent and dedicated engineering resources to support client teams, including software developers, cloud engineers, database specialists, and QA professionals.

7. IT Outsourcing & Managed Projects

Project-based software delivery, white-label development, offshore development support, managed engineering, quality assurance, and ongoing maintenance.

8. Customer Support & BPO

Technical helpdesk operations, Tier-1 and Tier-2 support, customer service workflows, ticketing automation, and service-level management.

SOLVING REAL BUSINESS CHALLENGES

Custom Application Development

Java, Spring Boot, Python, FastAPI, Node.js, React, Next.js, APIs, and database development.

Cloud Solutions & DevOps

AWS, Azure, Google Cloud, Docker, Kubernetes, CI/CD, and infrastructure automation.

SAP Enterprise Solutions

SAP ABAP, S/4HANA, enterprise integrations, and database transitions.

AI & Generative AI Solutions

AI/LLM integration, intelligent workflows, and Python-based solutions.

IoT & Connected Systems:

Embedded firmware, MQTT, telemetry, and monitoring dashboards.

Customer Support & BPO

Automated testing, technical support, maintenance, and managed delivery.

SERVICE OBJECTIVES

Modernize existing applications.

Automate repetitive workflows.

Improve system scalability and reliability.

Extend internal engineering capacity.

Accelerate product development.

Support technology operations and continuous improvement.
